ENGLAND.

WHITMAN, STANDART & CO.-

The election in this city to-day for Mayor and Councilmen, passed off without serious outbreaks, though there was considerable noise and confusion at the polts. Co. Shuft, the Independent candidate against Mayor Swann, withdrew his name about moon, issuing a card that it was impossible for his friends to vote, being intimidated by the Mayor's party. Mr. Swann was therefore again elected Mayor without opposition. His friends are rejucing everywhere. VEW PAPER.-RECEIVED THIS

Greater space between the strings in the atmosphering.
 The manner of atography the strengthm of theatring.
 The translate of the atheristics of the string.
 The quality of the time.

Thestrength of string.

. The great length of tipe which the instrument remains in tent. I will illustrate the philosophy of the two kinds of instru-sons, and leave the reader to draw his own conclusions.

ments, and leave the reader to draw his own conclusions.

I, The Hallet, Davis & Co. Piences have a greater length of string than those of any other make in the sume eited case.

The truth of this estimated may be seen at a glainer, as nearly the cuttire length of a straight string can be used for vibration, (see diagram) with a those that are heart inscensivity laws the read or bridge pin indeed as a great disease to the string on the end of the pissur; to the thing the condition of the pissur; to the thing would easy in twent before it could be drawn up within an outure of concert bricks. concert pitch.

It is well known that the reason a six-octave plane does not be reasonable for the point of the propose of the foliases and depth of time of a seven-octave plane in the foliases and depth of time of a seven-octave plane is for the strength of string, in that its strings are storter. With the above improvement, a fix octave itselfet, barried to the proposed of the control of of

2, The Hallet, Davis & Co. Pianos have a wider

The time of the heat visits in the world can be raised by substituting a poor bridge, thus proving that the time of a factor by an instituting a poor bridge, thus proving that the time of a factor by stretching. And it will readily be seen that if a stretching is also poor bridge, thus proving that the time of a factor by stretching. And it will readily be seen that if a stretching is also pool to the strength of the attenue in the attenue in the strength of a struct barring ine cans straing the cans of a strength in all other panels are stretching the strength of a strength of a struct barring ine cans straing from the strength as the will are the strength of a structure barring ine cans straing from the strength as the will are the strength of a structure barring in come of a structure barring in the strength of a strength of a structure barring in come The manner of stopping the vibration.

4. The evenuess of the vibration of the string. However good a saring may be, it will produce no tone nati it vibrates, and the evener the vibration the better the tons, or 70 vibrates eventy, the string dentited have but two districts times, directly to said for. The hommer strikes us the natiation, for diagram H. J. and the first motion of the string is to recent strength from the hommer. In the H. B. & On posses the string for the string is to return it is a straight offered line to list starting point, and then, if I vibrates a homesand times, its motion is by, down—np, down—of opinions.

The reason why strings so often tand why they invariably break at
